

SHRIMP FARM EQUIPMENT SUPPLIER

Professional Aquaculture Short Course

# SMART SHRIMP FARMING

## Intensive Multi-phase Shrimp Production in Circular Tanks

### ABOUT THE COURSE

This course offers the opportunity to learn novel farming techniques used for intensive shrimp production in round tanks, a method currently trending in Vietnam.

The concept of shrimp farming in round tanks is a significant step toward a circular economy, minimizing aquaculture effluents—an eco-friendly solution for enhanced sustainability.

Led by international experts, this training in Vietnam is designed to teach the best management practices for advanced shrimp farming techniques.
